**RATIONALE**

Information security is vital in establishing and sustaining trust between PEZA and its stakeholders, maintaining compliance with relevant regulations, and protecting PEZA’s reputation. Security of these information assets is essential in PEZA’s operation and managing overall risk. As PEZA holds and processes information through its systems and procedures, PEZA’s officers and staff are responsible to ensure that such assets are systematically given attention through appropriate protection against unauthorized disclosure, modification, misuse, destruction, and non-availability. It is imperative to protect PEZA’s information assets from all forms of threats through secure information sharing, consistent and professional use of information, clarity on rules in using and protecting information, establishment of business continuity, effective risk management and compliance to relevant prevailing rules and regulations. Hence, in order to streamline and document practice and standards which will protect its information assets, PEZA has previously conducted an intricate study of its Information and Communication and Technology environment and safeguards and crafted its Information Security Management System (ISMS) and Data Privacy documents last 2015-2017.

However, with the changes in business rules, internal policies, national regulations, cybersecurity trends, strategic plans and Information and Communications Technology (ICT) infrastructure for the past years, there is a need for PEZA through its Management Information Systems Department (MISD) to update its existing Information Security Management System (ISMS) and Data Privacy documents. This shall be accomplished through revision and reinforcement of obsolete policies, formulation of new standards, incorporation of new technologies and amendment of roster of variables which may impact PEZA’s information security.

Bidders must state here either “Comply” or “Not Comply” against each of the individual parameters of each Specification in the allotted section.
